PORTFOLIO

Waft.com *https://waft.com*

This is a web application for a personalized fragrance manufacturing company. I'm responsible
for both the back-end and some of the front-end for this application. (MEAN Stack)

Magloft Portal *https://www.magloft.com/portal*

Magloft Portal is a JavaScript web application which helps indie magazine publishers to create
and customize their own digital magazine. I've worked on the front-end part for this application.
(AngularJS)

iCityGuide *https://icityguide.online*

iCityGuide.online is a City navigator with Routes, Voice Guide and AR for tourists and city
dwellers to explore cities and radically simplifying the organization of tourist trips. I'm taking the
lead role in this project. (MEAN Stack)

Paladin True *https://paladintrue.com*

This is an E-Commerce application which helps users to Lend and Borrow things. I've worked on
the front-end part for this application. (AngularJS)

Kinoflix *https://kinoflix.com*
Kinoflix is a premium Internet Television Network, which seeks to digitally introduce its viewers with the very best in independent cinema through the very latest streaming technology. I've worked as a full stack developer for this application (LAMP Stack)

HospitalityJobs.com *http://hospitalityjobs.com*
This is a job board application. I've developed this website by using third party software called SmartJobBoard.

Immigration Advice *http://immigrationadvice.com/*
This is a blog which publishes articles about H1-B Visa. I've developed this website with Wordpress.

Riet College Website *http://rietrjy.co.in*
This is a rich graphic website for a famous college. Please visit http://rietrjy.co.in to know more. I've worked as a full stack developer for this application. (LAMP Stack)

SRKR CSI Website *http://srkrecitcsi.in/*
This is a website for a student organization which helps to automate their paperwork in SRKR Engineering College, Bhimavaram. Please visit http://srkrecitcsi.in to know more. I've worked as a full stack developer for this application. (LAMP Stack)

Copeps *http://mcr.org.in/varaprasad/copeps/*
This is an E-Commerce application which helps to sell/exchange/bid used things. This is my own idea and I've developed graphics, front-end and back-end for this application. (LAMP Stack)

Smart Slam Book
This is an online slam book application. I've developed graphics, front-end and back-end for this application. (LAMP Stack)

FillMyBag JavaScript Video Game
This is a JavaScript video game which was developed by me. I've created all the assets in photoshop for this video game. I've used JavaScript without any libraries to improve my skills. (JavaScript)

LazyOd Android Video Game
This is an Android video game which was developed by me. I've created all the assets in photoshop for this video game. I've used Java and android canvas for this video game. (Android, Java)

Many thanks,
vara.
